Career Objective

Motivated B.Tech CSE student with a strong foundation in Full Stack Development and Machine Learning. Eager to secure a challenging software development role where I can leverage my technical expertise in building scalable web applications and AI-driven solutions. Passionate about solving real-world problems through technology, with a commitment to continuous learning and professional growth. Looking for opportunities in product-based companies or innovative startups to contribute effectively and grow as a technologist.

Education

Parul University - B.Tech Computer Science Engineering Expected 2027
CGPA: 7.17 / 10.00

Relevant Coursework

Core: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

Specialized: Machine Learning, Natural Language Processing

Technical Skills

Programming Languages: Java, Python, JavaScript, HTML, CSS

Frameworks & Libraries: React.js, Node.js, Express.js, Flask

Database: MongoDB, MySQL

Machine Learning & AI: Scikit-learn, Pandas, NumPy, NLTK, NLP

Version Control & Tools: Git, GitHub, VS Code, Postman

Projects

Student Management System *Full Stack Project*

- Developed a comprehensive full-stack solution for managing student records with CRUD operations.
- Implemented RESTful APIs using Node.js and Express.js with MongoDB for data persistence.
- Designed responsive frontend interface using React.js with state management.
- Integrated frontend-backend connectivity with proper error handling and validation.
- Gained hands-on experience in project architecture, database design, and debugging.

Fake News Detector *Machine Learning + Flask*

- Built an end-to-end machine learning web application to detect fake news articles.
- Implemented NLP techniques (TF-IDF vectorization, tokenization, stopwords removal) for text preprocessing.
- Trained and compared multiple models including Logistic Regression, Naive Bayes, and Random Forest.
- Deployed the best-performing model using Flask for web interface integration.
- Achieved ~95% accuracy on test dataset with efficient real-time predictions.
- Utilized Pandas and Scikit-learn for data manipulation and model development.

Learning Roadmap

Full Stack: MERN Stack (MongoDB, Express.js, React, Node.js) - Deepening expertise through advanced projects

AI/ML: Generative AI, Advanced NLP, Deep Learning (PyTorch/TensorFlow)

Cloud: Cloud Computing (AWS/Azure) - Fundamentals and Deployment

Core: Data Structures & Algorithms - Strengthening problem-solving for technical interviews

Strengths

Quick Learner

Team Collaboration

Problem Solving

Creative Thinking

Tech Passionate

Adaptability

Languages

English (Professional Proficiency)

Hindi (Native)

Declaration

I hereby declare that all the information provided above is true and accurate to the best of my knowledge.
